PERMANENT COSMETICS

What is Semi-Permanent Makeup?

Semi-permanent makeup is a treatment carried out by a highly skilled therapist using the placement of pharmaceutical grade pigments into the dermal layer of the skin using the most up to date advanced technology and techniques.

All our semi-permanent make up is carried out by Hayley who has been in the beauty industry for 17 years. Hayley loves all aspects of Beauty but focuses her talents mainly on semi-permanent makeup as there is such a high demand for semi-permanent makeup at The Salon. Hayley will always carry out a detailed consultation to establish what the clients expectations are, the design will be drawn to find the correct shape and colour, ensuring that the client is entirely satisfied before going ahead with the procedure.

You will need to return in 4 to 6 weeks after the treatment for a retouch which is included in the price of the treatment.

Crystal Clear Facials

Beauty Flash Facial 25mins £27 - Course of 3 £73

This treatment allows an in depth exfoliation and then really concentrates on the areas you are concerned about, i.e. lines, wrinkles, scars, pigmentation. Muscle firming is then carried out by the lifting technique and an eye contour mask is applied to the eyes for 15 minutes, finished with a skin brightening complex and skin repair serum.

Crystal Clear De-Luxe Microdermabrasion 50mins £46.50 - Course of 3 £120

Following the completion of the in depth exfoliation, we apply the Mini Mask Lift which offers a cooling soothing and hydrating effect on the skin, the mask is left on for 30 minutes following the Microdermabrasion, allowing facial lifting and maximising the reduction of wrinkles. The mask contains amino acids and algae.

Dermaplaning £40 (course of 3 £100)

Dermaplaning removes dead skin cells and vellus hair (very fine body hair – often referred to as “peach fuzz” hair.) Our therapist will use a small, sterile blade while holding the skin tight, sweeping the blade in gentle upward motion to carefully scrape off the top layer of dulling dead skin cells in order to reveal a smoother, glowing, brighter and more youthful complexion.

Micro-Needling

Micro-needling is a revolutionary new treatment based on the principles of Meta Therapy. Meta Therapy is the only 100% natural skin improvement method with twofold effect. MetaTherapy combines both aspects: natural skin improvement from the inside out and externally applied active ingredients by means of special serums. A dual effect in the battle against skin ageing is tackling not just the consequences, but above all the cause of skin ageing. The skin ageing process can be slowed down considerably and the signs of ageing can even be visibly reduced.

HOW DOES META-THERAPY WORK?

Meta Therapy involves making invisible micro-perforations into the upper layer of the skin without causing any pain to the client. As a result, the skin moves into natural repair mode and starts producing collagen and elastin to repair the micro-perforations. Meta Therapy has a double active function; the controlled micro perforation activates the natural regeneration of the skin and applies the exact amount of active ingredients (via serums) in the layer of the skin where they can be most active.

The self-repairing property of the skin is a 100% natural form of skin renewal from the inside out. The skin becomes firmer and regains its elasticity, fine lines and wrinkles are visibly reduced, pores become finer, circulation is stimulated and the overall condition of the skin improves. Meta Therapy helps re-activate what your skin has lost over time by turning back the biological clock in a 100% natural way, giving your face a fresher and younger look.

Individual facials will of course give results but for the optimum results we recommend a course of 10 treatments, at a rate of at least two a week. After the course is completed a maintenance facial should be taken usually once a month.

Medik8®

SKINCARE BIOTECHNOLOGY™

Medik8 agePeel £45

Targets: Ageing/fine lines/wrinkles
Anti-ageing Peel: An effective combination of acids to reduce fine lines and wrinkles and fade away imperfections, leaving the skin smooth and renewed. When skin cells are activated, they can produce more collagen and elastin. Stimulation from a chemical peel can increase the production of many key elements that make up a youthful looking complexion.

Medik8 betaPeel £45

Targets: Acne/breakouts
Anti-acne Peel: Rapidly brings acne under control and dramatically reduces the risk of future outbreaks. betaPeel counteracts all three fronts of acne by targeting each assault individually: blocked pore, comedon and inflammation. betaPeel delivers a heavy dose of salicylic acid and azelaic acid straight into the pores and follicles, helping keep the pores clear of cellular debris therefore reducing the number of pore blockages and breakouts on the skin

Medik8 whitePeel £45

Targets: Pigmentation/sun damage/dark spots
Hyper-pigmentation Peel: The most effective way to achieve a brighter and even skin tone, is to eliminate skin cells rich in melanin and prevent the darkening of the new skin cells. white Peel is especially designed to target sun damage and hyper pigmentation problems with its key ingredients of L-Lactic acid and phytic acid, which is proven to reduce melanin formation creating a more even skin tone

Medik8 Light Peel £45

Targets: Ageing/pigmentation/acne/rejuvenation. A mild peel treatment for acne and lightly wrinkled skin or pigmented skins, the Medik8 Light Peel performs by effectively diminishing excess sebum, signs of ageing and light scarring.

Hair Removal

Lycon Waxing - Lycon wax is loved by celebrities and is used in top salons! The lovely aromas will relax you even before your treatment! The application of Lycon pre oil means that the 'Hot' wax doesn't adhere to the skin surface but shrink wraps the hairs therefore allowing hair removal nearly pain free, by adhering to the hairs only, it allows the skin minimum discomfort. Lycon 'strip' wax can be effective on hair as short as 2mm. Highly recommended for people with sensitive skin and on intimate areas.
